Customer Reviews

I needed a quick, easy guide to help me sort through the information from all of my notes (I'm an overzealous note taker, so they were overwhelming). Gerontological Nurse Exam Secrets and the companion flashcards were exactly what I needed to help get on track to succeed on the exam. This guide comes with a short, relatively easy exam, and the answer key is perfect for a quick study guide review, as the answers are explained in depth. The testing techniques that are discussed within the book have been amazing. I have been a poor test-taker in the past and have always gotten very nervous when it comes to taking exams, but, thanks to the study guide and exam techniques, I am no longer anxious about taking the test, because I know what to expect in the exam and have learned the relaxation techniques to use prior and during the exam. This is a must for anyone planning on taking this exam.

When you see this study guide claims to have the secrets you need to pass the test, you might be skeptical. But the book is what it says it is. It is a secrets guide to passing this test. There are many secrets in the book and they are all very helpful. There are test taking tips and study secrets, for example. But most importantly there is all of the information you need to know in order to do well on

the test. That means everything that is covered on the test is covered in this guide. All you need is there. That's the best secret of all. And you also get some practice questions at the end to give you an idea of what the test will look like as well.

Just read book first time and answered the practice question. Good review book, straight forward. Hope will be enough to pass the exam. If and when I do I can send another review. Comment only question #40 answer. I may agree with the answer that is a toxic dose of tylenol, but for aspirin you are saying 81 mg is low dose (maybe for one tablet) but the question states she takes 8-10 doses daily, which will make it 810 mg aspirin. This should be the answer. If I pass, I will highly recommend your book to co-workers. I'm the first in my job to take this exam. Majority including myself have already passed the med surg certification exam.

A good way to prepare for any exam is to get in some great practice. This guide has an all-encompassing practice test that is in-depth and complete to help you practice well. It also includes some study secrets that are exceptional.

This study guide has a lot of information that is new for me. If I had taken my exam without purchasing it I probably would have bombed it...

It's a wonderful system that works for me. It helps to understand and memorize the material. I hope it will help me to pass the test.

So far the product has been great, easy to study on the go and concise information. Really good study tool.

This study guide is perfect to prepare for the gerontological nurse exam!
